

Dear 107 OAKLAND STREET LLC,

I am writing to inform you of important events taking place locally that will greatly affect the health, value, and standard of living at your property at 107-111 OAKLAND ST in RED BANK. JCP&L is planning on installing 140-210 foot tall 'monopole' style towers along the NJ Transit Rail line from Aberdeen to Red Bank. These are so tall that they will be visible for MILES on either side. There are many studies that link living near these power lines with increased risk of childhood cancer. They will tower over everything in our area. They are as little as 100 feet from elementary schools, parks, churches and preschools. Due to all of these factors, properties in the vicinity of these lines will lose tens of thousands of dollars in value overnight and our residents will be exposed to ElectroMagnetic Fields (EMF's), the risks of which are not yet fully understood.

**YOUR HOME LIES A MERE
137 FEET
FROM THESE DAMAGING
EYESORES!**

That's the bad news.

Here is the good news.

There is still time to stop this madness. JCP&L is currently is about to apply for the permits to begin work. You can join the fight. Join the Facebook Group. Call the Mayor. Call your representatives. Spread the word. Talk to your neighbors. Unless we make a stand, JCP&L will make and eyesore out of our beatiful towns in the name of unimpeded progress. Many of us are unwilling to allow that to happen. Will you join the fight?
